

CORNING

Efficient. Fast. Secure.

Multitenant Data Center (MTDC) Solutions Guide

Trust Your Multitenant Data Center to Corning

Connecting to the right solutions can help you optimize your network.

To help you achieve effective data center operations that meet the core needs of your customers, we've created this easy-to-use guide that highlights our extensive range of solutions developed for outside plants, meet-me rooms, main distribution areas, and cage environments. We have also provided at-a-glance ordering information for our most popular products to reduce the time and effort you spend on your end-to-end infrastructure.

By developing solutions that are well aligned with the need for effective data center operations and addressing the core needs of enterprise clients and cloud providers, Corning Optical Communications has achieved significant success.

Contents

- MTDC Complete Connections program 4
- Outside Plant Cable and Meet-Me Room 7
 - EDGE Rapid Connect 8
 - Field Terminated Data Center Interconnects .. 9
- Packaging Spotlight 10
- Backbone Cabling 14
- Main Distribution Area 18
- Caged Area 22
 - Base - 12 23
 - Base - 8 25
- MTDC Certified Fiber Design Training Course .. 27
- Authorized Distribution 28
- Resources 29

We offer products and solutions that meet the needs of your MTDC on day one while being flexible enough to adapt to future changes:

- Rapid deployments for low- to high-density applications
- Quick product availability so you can provide competitive service level agreements (SLAs)
- Secure separation between live circuits for client peace of mind
- Usable vs. theoretical density
- A highly scalable platform for simple migration to higher-speed technologies and applications

For maximum flexibility, improved lead times, and a reduction in total cost of ownership in your future-ready MTDC, you can count on Corning.

For MTDC Operations:

- Dedicated National Account Manager
- Competitive, quick response for pricing inquiries
- Rapid product delivery supported through our national distribution network
- Award-winning customer care dedicated to program members
- Design and systems engineering team dedicated to program members
- Customizable, live training webinars
- On-site training

For Customers Going Into an MTDC:

Let us provide peace of mind by connecting you to a member of the MTDC Complete Connections Program. They have the products, services, and experience to put your business on the path to success.

The MTDC Complete Connections Program connects you to:

A network of trusted MTDC operators and certified systems integrators who receive preferred access to Corning training, service, and technology.

World-class MTDC facility optical backbone infrastructure.

Global distribution inventory to provide rapid physical layer availability, anywhere you need it.

For more information, visit www.corning.com/mtdc-complete-connections

As a **leader** in optical technology, with nearly **30 years of experience and innovation** in data center solutions, we work with you to assess your data center deployment options. When you meet with our team of experts, we'll discuss your data center journey, introduce you to our **data center capabilities** and support services, and together we will determine the **right solution** for your organization. We've evolved our **expertise and experience** to offer you the following:

Design Services

Our Field Engineering Services consultant program offers on-site assistance, ranging from proposal design through project completion, at any phase of a project. These services include network design and site survey, on-site technical assistance, splicing, termination, testing services, and troubleshooting and emergency restoration.

Product Solutions

Because every data center is unique, EDGE™ and EDGE8® solutions provide a family of modular, tip-to-tip connectivity options. Each solution is uniquely configurable, offering faster, simpler installation, higher density, superior cable management, easier moves, adds, and changes (MACs), and flexible migration paths.

Order Tracking

Secure login and 24/7 global access, with enhanced insight into active purchase orders and real-time shipping information in your language.

Implementation Support

Designed to reduce the time to “go live” and improve your organization’s return on investment, our implementation support is customized for your specific needs.

Global Distribution Partners

The solutions you need, regularly in stock at our global network of distributors where you need them. Scale with a global manufacturer for a consistent product portfolio to offer clients.

Training/Programs

No one understands fiber optics better than the company that invented it. That’s why we are committed to providing the industry with an unprecedented level of expertise and support through our comprehensive – and customizable – training programs for contractors, installers, designers, and end users. Our courses are recognized by globally accredited organizations and are available as hands-on learning or online instruction.

Enabling Connections in all Areas

Outside Plant Cable and Meet-Me Room

- Meet the conduit space available
- Deploy quicker
- Utilize splicing labor

Backbone Cabling

- Fully utilize tray space
- Secure connections to customers
- Match required fiber counts

Main Distribution Area

- High density for more whitespace
- On-site inventory
- Quicker cross-connects

Caged Area

- Modular and scalable to 400G
- High density to maximize investment
- Global consistency in solution

Outside Plant Cable and Meet-Me Room

Our Corning® RocketRibbon® extreme-density cables, combined with our innovative splice closures and hardware, can help meet the increasing bandwidth demands in your most challenging environment. Plus, compared to competitive solutions on the market, our data center interconnect (DCI) solutions reduce installation time by up to 50%.*

Looking to further speed up installation? We developed a solution that allows for a 70% faster installation in an interconnect deployment by developing a new connector technology to eliminate splicing in high-fiber-count outside plant cables. To learn more, go to: www.corning.com/edge-rapid-connect

**REDUCE INSTALLATION
TIME BY UP TO**

50%

**The 50% savings refers to the time to furcate, route, and splice our solution compared to competitive solutions on the market.*

EDGE™ Rapid Connect

Data Center Interconnect Preterminated Solution

Designed with new Fast-Track MTP® Connectors and routable subunits, this rugged, high-density cabling solution is optimized to let you complete data center interconnects faster than ever. It matches the density found in comparable data center interconnect splicing solutions, no splicing necessary, saving you up to 70% on installation time when installing trunk cables between data center buildings. And our engineering support team can help make sure your deployment is a success.

If you're ready to eliminate the time and complexity of splicing, visit www.corning.com/edge-rapid-connect to learn more.

Field-Terminated Data Center Interconnections

Field-Terminated Data Center Interconnect Solutions

Our routable subunits are optimized for your entire data center interconnect solution. Starting at your outside plant all the way to your cross-connect, it can help meet the increasing bandwidth demands in your most challenging environment. Plus, compared to competitive solutions on the market, our DCI solutions reduce installation time by up to 50%*

*The 50% savings refers to the time to furcate, route, and splice our solution compared to competitive solutions on the market.

Packaging Spotlight

Jumper Packaging Options

Figure-8 Packaging

- Lower waste-removal fees
- Pulls from either end
- Faster install time

See the Figure-8 Packaging at Work

Jumper in a Box ECO Series

- Color to denote SM or MM
- Length easily visible
- Linked bags
- Numbered bags
- Eco-friendly version with on-site inventory and reusable plastic box
- Refill option
- Environmental messaging

RXD-0SE-1	Optical Splice Enclosure - RXD (OSE-RXD), 6,912 F capacity, with 24 x 288 F Splice Trays
RXD-0SE-1-HD	Optical Splice Enclosure - RXD (OSE-RXD), 13,824 F capacity, with 24 x 576 F Splice Trays

Backbone Cabling

Structured cabling is crucial to any multitenant data center. The backbone cabling is the highway between distribution areas. Need to connect a customer at a moment's notice? An organized backbone cabling layout will help do it faster and quicker, which means less time before making revenue.

Corning provides flexible solutions depending on the application and installer requirements, from LC to MTP® connectivity, in both preterminated assemblies and various field-terminated options.

Preconnectorized EDGE-02U with routable subunits

Main Distribution Area

Main distribution areas are critical for the structured cabling portion of your data center. Corning has leading solutions tailored to different scenarios. This includes splicing and preterminated solutions depending on the operator specifications. There are also high-density preterminated solutions for those who need the structured cabling but in a smaller footprint.

Caged Area

Managing the caged area just got simpler with our range of flexible, ultra-high-density solutions. We offer comprehensive support, from upfront design and engineering through post-installation testing and support, and our rapid manufacturing capabilities can maintain customer SLAs – even with custom-length components. Experience reliable, continuous visibility into network traffic with integrated passive optical tapping capabilities. Gain peace of mind from enhanced port breakout capabilities for disaggregating higher-speed ports.

MTDC Certified Fiber Design Training Course

This seven-hour course is aimed at the multitenant data center ecosystem, which includes integrators, MTDC operations, and data center technicians who design fiber optic infrastructure. We will discuss fiber basics and data center solutions from outside plant cable, structured cabling infrastructure, and MTDC cage solutions. After this, we will review data center standards and walk through case studies for multiple scenarios that attendees may see in a data center or within the MTDC facility.

No prerequisite: Basic understanding of fiber optic theory, connectivity, and design is recommended.

CORNING

MTDC
Complete Connections
Program

Instructional Areas:

- Theory, fiber, and sources
- Interconnecting buildings (DCI)
- Cable
- Case study walkthrough for DCI
- Connectivity preterminated solutions
- Hardware
- Case study walkthrough for a preterm design
- Networking
- Case study walkthrough (MMR1 to MMR2 design considerations)

Who Should Attend?

Geared for system designers looking to expand on their fiber optic knowledge.

Need more information on our training opportunities or looking for customer site training? Please email us at STLinfo@corning.com

Authorized Distributors

We understand that your pay-as-you-grow LAN or data center infrastructures depend on modular products delivered fast. To meet your requirements, we've nurtured long-term relationships with authorized distributors who stock our products and further support your needs, including training, customer needs assessment, project planning, design, logistics, and equipment. Whether you are an end user, contractor, or installer, connect with their sales and technical support teams about your Corning solution today.
